operations. If no program statement is filed, an explanation must be submitted.

§76.13 [Deleted]

§76.14 Who May Sign Registration Statements.

(a) Registration statements shall be personally signed by the operator; by one of the partners, if the operator is a partnership; by an officer, if the operator is a corporation; by a member who is an officer, if the operator is an unincorporated association; or by any duly authorized employee of the operator.

(b) Registration statements may be signed by the operator's attorney in case of the operator's physical disability or of his absence from the United States. The attorney shall in that event separately set forth the reasons why the registration statement was not signed by the operator. In addition, if any matter is stated on the basis of the attorney's belief only (rather than his knowledge), he shall separately set forth his reasons for believing that such statements are true.

§76.16 [Deleted]

§76.17 Public Notice.

The Commission will give public notice of the filing of registration statements.

§76.18 [Deleted]

§76.20 [Deleted]

§76.25 [Deleted]

§76.27 [Deleted]

§76.29 Special temporary authority.

(a) In circumstances requiring the temporary use of community units for operations not authorized by the Commission's rules, a community unit may request special temporary authority to operate. The Commission may grant special temporary authority, upon a finding that the public interest would be served thereby, for a period not to exceed ninety (90) days, and may extend such authority, upon a like finding, for one additional period, not to exceed ninety (90) days.

(b) Requests for special temporary authority may be submitted informally, by letter, and shall contain the following:

(1) Name and address of the applicant cable system.

(2) Community in which the community unit is located.

(3) Type of operation to be conducted.

(4) Date of commencement of proposed operations.

(5) Duration of time for which temporary authority is required.

(6) All pertinent facts and considerations relied on to demonstrate the need for special temporary authority and to support a determination that a grant of such authority would serve the public interest.

(7) A certificate of service on all interested parties.

(c) A request for special temporary authority shall be filed at least ten (10) days prior to the date of commencement of the proposed operations, or shall be accompanied by a statement of reasons for the delay in submitting such request.

(d) A grant of special temporary authority may be rescinded by the Commission at any time upon a finding of facts which warrant such action.

Subpart C — Federal-State/Local Regulatory Relationships

§76.30 Scope of application.

The provisions of this subpart shall not apply to any system community unit that constitutes all or part of a cable television system that serves fewer than 1000 subscribers.

§76.31 Franchise standards.

Franchise fees shall be no more than 3 percent of the franchisee's gross revenues per year from all cable services in the community (including all forms of consideration, such as initial lump sum payments). If the franchise fee is in the range of 3 to 5 percent of such revenues, the fee shall be approved by the Commission if reasonable upon showings: (i) by the franchisee, that it will not interfere with the effectuation of federal regulatory goals in the field of cable television, and (ii) by the franchising authority, that it is appropriate in light of the planned local regulatory program. With respect to a system community unit that was franchised or in operation prior to March 31, 1972, the provisions of this paragraph shall not be effective until the end of the system's current franchise period, or until 15 years from the date of initial grant of the franchise, whichever occurs first.

NOTE: The following procedures and provisions are recommended for adoption as part of the local franchising process, but are not mandatory:

(1) The franchisee's legal, character, financial, technical, and other qualifications and the adequacy and feasibility of its construction arrangements should be approved by the franchising authority as part of a full public proceeding affording due process;

(2) The initial franchise period should not exceed fifteen (15) years; any renewal period should be of reasonable duration, not to exceed fifteen (15) years, such renewal to be granted after a public proceeding affording due process;

(3) The franchise should specify that the franchisee shall accomplish significant construction within one (1) year after receiving Commission certification, and shall thereafter reasonably make cable service available to a substantial percentage of its franchise area each year (such percentage to be determined by the franchising authority);

(4) Where a franchise contains a policy of construction requiring less than complete wiring of the franchise area, such policy should be adopted only after a full public proceeding, which includes specific notice of the consideration of such a policy;

(5) The franchise should:

(i) specify that procedures have been adopted by the franchisee and franchisor for the investigation and resolution of all complaints regarding cable television operations;

(ii) require that the franchisee maintain a local business office or agent for these purposes;

(iii) designate, by title, the office or official of the franchising authority that has primary responsibility for the continuing administration of the franchise and implementation of complaint procedures; and

(iv) specify that notice of the procedures for reporting and resolving complaints will be given to each subscriber at the time of initial subscription to the cable system.

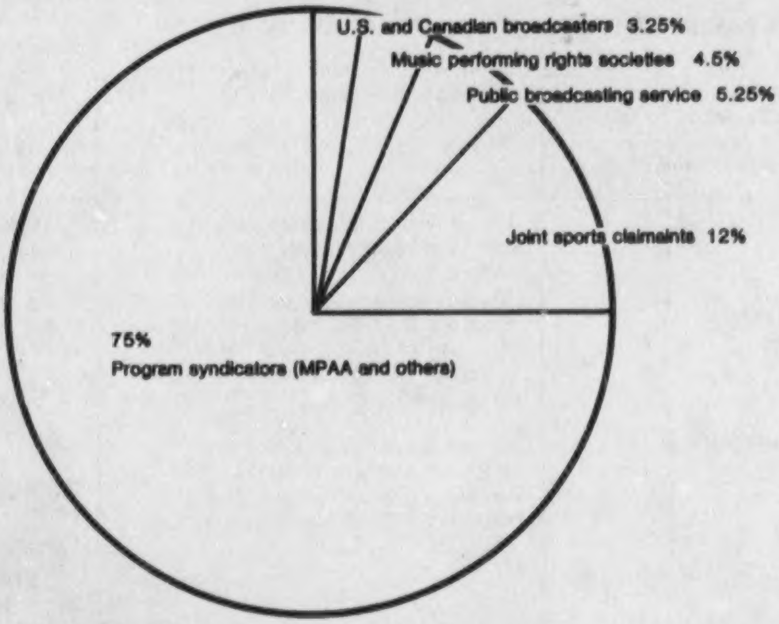
COPYRIGHT PRIMER

In 1980 changes were made in the cable copyright royalty rates. The charts and tables below illustrate the growth of cable royalty payments since the initial payment in 1978 and the distribution of the 1978 cable payments. The new cable payment rate computations are also shown for all three revenue categories.

DISTRIBUTION OF 1978 CABLE ROYALTIES



COPYRIGHT PAYMENTS BY CABLE SYSTEMS

Year	January 1—June 30	July 1—December 31	Total
1978	$6,164,834.68	$6,700,423.68	$12,865,258.36
1979	$7,523,016.22	$8,259,163.64	$15,782,179.86
1980	$9,522,647.81	$9,682,602.84	$19,205,250.65
1981	—	—	$26,000,000.00*

COMPARISON OF 1980 AND 1981 COPYRIGHT PAYMENTS

(Based on Form III systems with 2.5 distant signal equivalents)

Example A: A system with semi-annual subscriber revenues (basic cable) of $300,000 for both 1980 and 1981.

Example B: A system with semi-annual subscriber revenues (basic cable) of $500,000 for both 1980 and 1981.

	1980	1981	Increase
System A	$3,937.50	$4,764.00	20.9%
System B	$6,562.50	$7,940.00	20.9%

CABLE ROYALTY PAYMENTS BASED ON THE 1980 ADJUSTMENTS

Semi-Annual Subscriber Revenue (Basic Cable)	Semi-Annual Payment Rate	Computation
Under $55,500 (Form I)	$20	$20
$55,000—$107,000 (Form II)	0.5 percent of "adjusted revenue" Method of calculating adjusted revenue: 1) Subtract actual revenue from $107,000, and then 2) Subtract result of Step 1 from actual revenue to determine adjusted revenue.	Example: Revenue ‡ $80,000. 1) $107,000 − 80,000 $ 27,000 2) $80,000 − 27,000 $53,000 = Adjusted revenue $53,000 × .005 Copyright payment = $265
$107,000—$214,000 (Form II)	0.5 percent of gross subscriber revenues up to $107,000, plus 1.0 percent of gross subscriber revenues between $107,000 and $214,000.	Example: Revenue = $167,000 1) $107,000 × .005 = $535 2) $ 60,000 × .01 = $600 Copyright payment = $1,135
More than $214,000 (Form III)	Payment based on number of distant signal equivalents. .817 percent of gross receipts for first DSE. .514 percent of gross receipts for each DSE from one to four. .242 percent of gross receipts for each DSE over four.	Example: Revenue = $500,000 DSE = 2.5 1) $500,000 × .00817 × 1 = $4,085 2) $500,000 × .00514 × 1.5 = $3,855 Copyright payment = $7,940

PROGRAMMING SERVICES

Listed below are both pay and basic programming services. FEDERAL COMMUNICATIONS COMMISSION—1979 CABLE TELEVISION INDUSTRY DATA

Reliable figures on the cable television industry are hard to come by, especially financial data. The Federal Communications Commission recently released its computations for the cable industry in 1979 and, although dated, it does shed some light on the growth of the cable industry in the last five years. The tables and charts below cover the 1979 fiscal year and the growth of the cable industry from 1975 to 1979.

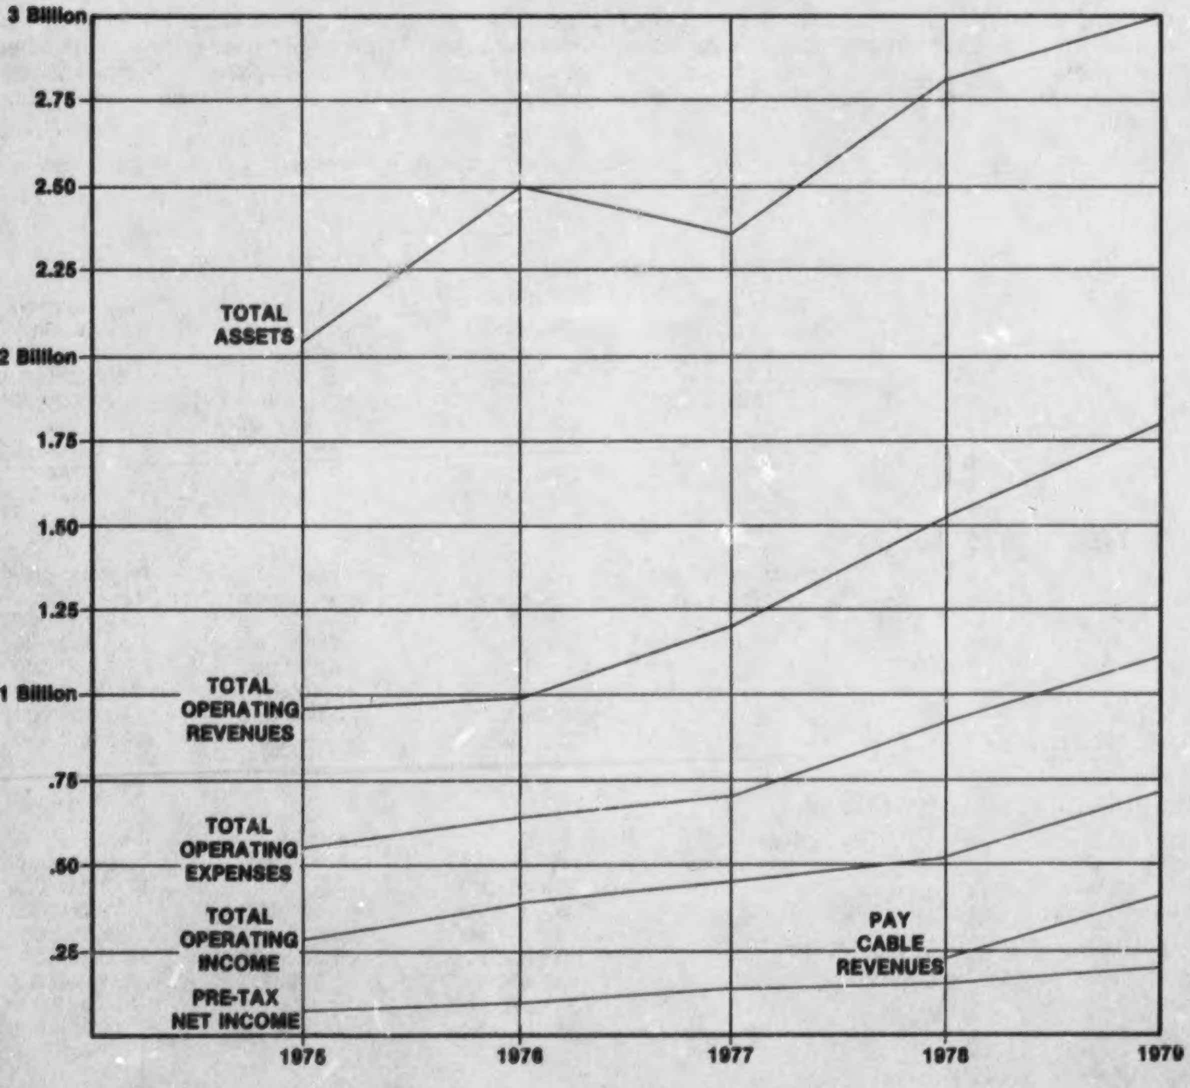
CABLE TELEVISION INDUSTRY FINANCIAL HIGHLIGHTS
1975-1979



CABLE TELEVISION INDUSTRY DEBT FIGURES

A cable system's ability to fulfill its franchise promises usually depends on the availability of and success in obtaining financing. In recent years the cable industry's debt has increased significantly as the last rounds of the franchise wars have been fought and massive city systems have begun construction. The tables and charts below illustrate the finance industry's gradual acceptance of cable as a financially legitimate industry and indicate the lending climate the cable industry can expect in the future.

SYSTEM PROFILE LEGEND

The System Profile is CableFile/82's listing of all the cable television systems operating in the United States and her territories. Where the information has been available, we have provided a complete listing of all the pertinent information about the cable system, including the local manager, number of subscribers, the miles of plant, basic and pay cable rates and the name of the pay program supplier. In cases where we were unable to obtain all the information, we have listed all the information that was available.

We have incorporated into the system profile the HBO; Showtime logos which appear above the listings of systems that offer these pay services to their respective subscribers (these are paid advertisements).

Below is a legend explaining all the possible entries for any given cable television system. Not all of these entries will appear for every system listed.

FOREWORD

For the past seven years **CableFile**—the annual cable television reference directory—has charted the rapid growth of the cable television business. **CableFile/83** represents a mature cable television industry, one that has slowed its explosive growth of the late '70s and that can be depicted only in voluminous detail.

The material supplied in these two volumes of **CableFile/83** is gathered from system operators, system owners, programmers, and suppliers. There are no suppositions from random samplings or extrapolations based in industry trends. **CableFile**'s superiority rests in its collection of vast amounts of raw data and organization into a legible and comprehensive format.

This year's directory provides five new sections which delve into the areas of programming, finances, and brokerage. More specifically, **CableFile/83** includes a Satellite Service Growth Chart which summarizes the maturation of basic/pay programming services. We have supplied a directory of program producers and a list of their current cable projects. As an added feature fifty of the top companies in cable are profiled with accompanying financial charts. We have updated and expanded the brokers and financial analysts section to provide you with convenient access to their services.

CableFile/83 offers an array of information bound into one reference source. In the years to follow, **CableFile** will continue to monitor cable's growth, and present you with an up to the minute reference publication.
